**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/7/06 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1, 5, 6, 9, 12, 13, 15 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Fleming (4,193,524). Fleming discloses, in fig. 8, a closure cap 108 for a container provided with a container aperture including a container neck 112, said closure cap configured for releasably engaging the container neck so that a medium can be discharged from the container, and releasably sealing the aperture so that the discharge of the medium is substantially prevented, wherein said closure cap comprises at least one circumferentially closed wall section 108, 14a, wherein a fin sealing device is provided having at least two radially projecting, elastic fins which are spaced apart in the axial direction of said closure cap and integrally connected to said closure cap, said

fins having a generally rectangular, washer-shaped cross-section and being configured for engaging the container neck, wherein said closure cap is provided with one of a thread and a threaded portion configured for coupling said closure cap with the container.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-4, 7, 8, 10, 11, 20 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Fleming in view of Barriac (4,723,668) or Ostrowsky (4,487,324) or Hammett (4,463,882).

Fleming does not disclose the closure cap having a hinged lid attached thereto.

The other references teach a closure cap having a hinged lid attached thereto to cover the opening of the closure cap.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure cap of Fleming with a hinged lid, as taught by other references, in order to cover the opening of the closure cap when it is not used.
